

Case Study

An oil & gas consulting company gains real-time visibility and control over procurement by implementation of budgeting through EPPS ERP

About the company

In 1988, the company started as a Petroleum consulting company, specializing in horizontal well technology and reservoir evaluation. They are a leader in the application of horizontal well technology with major oil companies, independents, and national oil companies as their clients.

Business case

- »» Control over procurement and bill clearance for payments.
- »» Control expenditure through real time visibility into budget allocation. Reservation and consumption are managed seamlessly from the system.
- »» Workflows to be defined for approvals based on value and approvals to be managed through the system. Eliminate administrative delays in follow-ups through approval work flows and notifications.
- »» Bill certification is facilitated from the system, based on the services and material received.
- »» Purchase budget reservation during PO and budget consumption during GRN.
